SUMMARY

I am a B.Tech mechanical engineering graduate and a certified Product Management professional seeking an Associate Product Manager role. i am Passionate about applying strong analytical and technical skills to guide product vision, execute roadmaps, and collaborate with engineering, design, and marketing teams to launch market-ready products.

EDUCATION

Bachelor of Engineering in Mechanical Engineering Andhra University,
Visakhapatnam, Andhra Pradesh - 2022 CGPA: 8.20 **Diploma in
Mechanical Engineering** Government polytechnic, Visakhapatnam,
Andhra Pradesh - 2019 Percentage: 69.23%

Matriculation (10th Standard)

Board of Secondary Education, Visakhapatnam, Andhra Pradesh - 2016
CGPA: 10

CERTIFICATIONS

- Product Management with Gen AI – PW Skills (2025)
(<https://pwwskills.com/learn/certificate/40c28678-2ff1-456f-bfbb-97b755c2c4c6/?isCareerPath=true>)
- CN C Machining, Autocad (2021), and Solid Edge – IGIAT (2019)

SKILLS

- **Product Tools:** Figma, FigJam, Balsamiq
- **Research & Design:** UX/UI Design Principles , A/B Testing, Customer Journey Mapping, Market Research, Data Analysis.
- **Project Management:** Cross-functional Team Collaboration, Agile (JIRA, SCRUM)
- **Technical:** AutoCAD, Catia V6, Solid Edge
- **Productivity Tools:** MS Word, Excel, PowerPoint
- **Soft Skills:** Leadership, Strategic Planning, Communication

PROJECTS

CapstoneProject – Product Management with Generative AI (Sept 2024- April 2025)

- Led the integration of Generative AI tools to streamline user research, feature prioritization, competitive benchmarking, and go-to-market (GTM) strategy development.
- Analyzed feedback from over 50 potential users to identify top pain points and define high-impact features using frameworks like RICE and MoSCoW.
- Conducted competitive analysis across 5+ market players, uncovering gaps that informed differentiated product positioning.
- Developed a data-driven GTM strategy with projected 20% user adoption growth in 6 months and 15% cost reduction in research and planning phases.
- Demonstrated strong decision-making based on market trends, customer personas, and value propositions.

Prototype of Reciprocating Power Hacksaw (Nov 2021- May2022)

- Designed and prototyped a user-friendly DC-powered mechanical hacksaw that achieved a cutting speed of 120 inches per minute, enhancing usability and effectiveness for DIY enthusiasts and home improvement projects.
- Led the project from ideation to completion, guiding teammates and managing execution.

INTERNSHIP

StudentTrainee – Hindustan Shipyard Limited (Nov 2018 - May 2019)

- Collaborated with engineering teams on shipbuilding and dry docking operations, contributing to the maintenance of naval and commercial vessels.
- Supported the project team in planning and progress tracking for ship repair schedules, helping improve project coordination by 25%.
- Participated in safety audits and material inspections, contributing to a 15% reduction in material waste during overhaul activities.
